

Previous batch viva questions

- 1) Interviewer: Ritika
Camera On

Questions:

About scenario

How did you implement Exception in scenario

She asked me write code

Collections

Collection Interface

ArrayList Set

Spring MVC working

Dispatcher Servlet

- 2)

Ritika

1) Scenario

2) annotations used in scenario

3) custom exception code for scenario

4) What is spring MVC

5) Spring JPA

6) JSP

7) Model and view

8) Serialization

9) Write code for employee class printing salary of the employee

10) functional interface

- 3) SME: Hari Prasad

Oops concepts

Spring IOC

Servlet

JPA

Oops concepts(explain all of them)

loc

Dispatcher servlet

Polymorphism

Done with viva hari prasad

**Oops concepts
Entity manager
Servlet
loc**

- 4) Sme: jagadish
Java servlets
Jstl
Resolver
Jsp
Cam off but he was very fast while he was asking questions.**

- 5) Viva done with sharmilee
Scenario
Spring MVC
Set and list
Linked hash map
Spring framework
Jsp views
Spring MVC she is asking everything in depth..**

- 6) Viva done Sharmilee
Video on
Scenario
Oops
Abstract class and interface
Dependency Injection
Spring mvc
Introduce yourself
scenario explanation
Autowired annotation
Can we use @autowired in fields and some in depth in autowired
Spring data jpa
Tell me about yourself
Scenario
Controller
Request handler
Root context child context
View resolver**

How to validate after all is being done

Diff bet size n range

Mvc flow

Advantage of boot

Dispatcher servlet

How was asa

Jsp vs servlet

- 7) Proctor:Kalimuthu g--video off,No Screen share
- 1) Scenario
 - 2)What is Spring boot
 - 3)What is JPA
 - 4)what is spring Controller
 - 5)What is Maven
- 8) Proctor: Alam Vakar--Video On, Screen share
- 1.Multi threading topic
 - 2.collection topic
 - 3.diff between list and set
 - 4.how may ways we can create a class
- Advanced topics also..
- Crud operations..
- Annotation..
- Spring related ...
- He is giving scenario and asking like wt r the annotations we can use for This..
- 9) 1)Spring mvc:
- 2)Dynamic binding static binding
 - 3)Persistencecontext something
 - 4)Persist and merge
 - 5)Array list vs array
 - 6)Expression language
 - 7)Local variable vs instance variable
 - 8)Validation of min max
 - 9)How will you auto populate dropdown box
- Functional interface
- Protected access specifier
- Functional interface
- Scenario

Java 8 features

@Valid

@Value

Throw and throws

Scenario

Validations

Value tag and value annotation

Join annotation

Cascading

When does an entity move from a new to managed state?

Named query

Array list and array

Scenario

@temporal annotation

Runnable interface

Interface abstract class difference

Autowired

Types of auto wired

Try catch

Multi threading

Array arraylist

Named query

10) Proctor:Kausar khan is the sme-- Video On

She is asking abt -

thread

synchronization

encapsulation

annotations

many questions on scenarios

challenging part in scenario

have you attempted q no. 7 like that

Life cycle of thread, demon thread n normal thread diff, serialization, jpa,

hibernate, too many questions on scenario

1.How was the scenario?

2.what was the 1st requirement in that?

3.How did you validate that?

4. Did you create a database?

5. there was a calculation of total amount requirement know? What was it and how did you do that?

Core java topics

2.What is abstraction?

3.Ways to achieve abstraction?

4.What is an exception?

5Difference between throw and throws?

6.What is the dispatcher servlet?

7.what is dependency injection in spring?

8.Why do we use autowire in spring?

9.Types of autowire?

10.Annotation?

Scenario

Challenges any

Core java- abstraction

Difference in abstract class and interface

Threads

Loose coupling

Advanced- servlet life cycle

Spring container

Jsp

Comparator and comparator interface

Upcasting and downcasting

SQL injection

Backend controller

Static and dynamic binding

@value

- 11) Proctor: Jadhav -Video off, No screen share
Spring rest, what are all the repositories, scenario, validations, jpa, spring
jpa, spring jpa data, annotations
- 12) Divya Madhanasekar
Asked to explain the scenario
And her pattern is like..she will tell the definition of something and will ask
you what it is..
Like for me .She asked how do you bind the spring form data into the
spring beans ..what do you use for that??
Custom exception she asked.
Difference between spring rest and spring mvc
Spring mvc flow
Tell about your scenario based question

What technology was used

How do you populate drop down on JSP and what tag is used for drop-down

How do we convert entity to bean

What methods do we have in CRUD repo that we use

How do you create a custom exception

13) Nithin is so strict for me it lasts for 23 mins

He started regarding with

1.Scenario and spring boot and spring MVC

2. Serialization

3. Threads and multi-threads creation

4. JPA annotations

5. More questions on core java

He just keep on asking questions 🙄 very depthly he asked he asked syntax

He just gave an example of an employee and asked me write code

Collections implementation

14) Interviewer: Apurva

Camera:ON

1.)error vs exception

2.)checked vs unchecked

3.)JDBC vs jpa

4.)multi level inheritance

5.) thread life cycle

6.) scenario based questions

7.) custom exception

8.) model and view

9.) annotations used in scenario

15) 15 min normal Question from JDBC

ORM

DATA JPA

OOPS

IOC

AND CONCEPT WISE QUESTIONS FROM NOWHERE ANYTHING

THEN SCENARIO

COMES TO NORMAL TALK ABOUT AND QUESTIONS FROM MCQ SAME HOW TO DO IT AND

LAST ABOUT CUSTOM EXCEPTION

- 16) **Rithika**
Scenario, requirements
Annotations used
How we validate the annotations in controller
@SessionAttribute why we use
Spring MVC flow
Write code on collection
What is abstract class
What is inheritance
What is servlet
Jsp vs servlet
Can jsp called from servlet
- 17) **Proctor-sharmilee**
Scenario and ques related to that..custom exception
What is Transactional
Logical and physical transactional
Maven
Idempotent http methods
Safe https methods
@exceptionalhandler
- 18) **viva -ritika**
Explain scenario
Write custom exception
Write code for collection ->store employee salary details
Dispatcher servlet
@autowired
Interface
List vs set
Comparable
JSP implicit object
JSP lifecycle
- 19) **Batch 8:30 to 12:30**
Number. 57
Proctor. Pratibha
Time: 12:55pm to 1:05pm
About Scenario
Entity manager

Spring MVC flow

@autowire

@view resolver

Mandatory Annotations used in entity manager

- 20) **Ritika**
- 1)Scenario
 - 2) annotations used in scenario
 - 3) custom exception code for scenario
 - 4)What is spring MVC
 - 5)Spring JPA
 - 6)JSP
 - 7)Model and view
 - 8)Serialization
 - 9)Write code for employee class printing salary of the employee
 - 10) functional interface
 - 11) abstraction
 - 12) view resolver... actually she asked many questions i forgot some questions only
- 21) **Prathiba**
- Spring mvc, how we used in Scenario
- Annotations
- Entity mandatory annotations used in scenario
- Explain about scenario
- Technologies used in scenario
- How to use same bean classes
- @Autowire**
- @entitymanager**
- Tell about jsp, jpa
- Jstl
- What are annotations used in entity class
- What is request mapping
- How the servlet works on
- Explain brief about MVC
- 22) **Intro**
- 1.What are constructors? Why do we need it?
 - 2.What are the types of dependency injection
 3. **@controller**

- 4. Model ,view ,controller based question
- 5. Transactional
- 6. What is IOC container
- 7. Dispatcher servlet
- 8. How do you confirm that validation is done after submitting the button
- 9. What are different modes of @autowired annotations

23) Proctor apurva

Video on

Core Java:

Collection

Tostring method

Checked unchecked exceptions

Arrays

Advanced java

Spring orm

dependency injection

Entity manager

Scenario

Jdbc connection

Custom exception

Maven

How to validate annotations

24) Proctor :- Sandesh Hanumegowda

Video on

1) Explain Scenario.

2) Why do we use @Transactional?

3) Java 8 features

4) Autowiring

5) why application-context

5) constructor overloading

6) Regarding Boiler plate code

7) @Request mapping

8) How do you validate a field ?

9) So many questions..

25) Few questions on core java

Few questions on adv java

Questions regarding scenario

Explain what do you understand on scenario

@autowiring

loc

Set and list

Superclass

Types of inheritance

Multiple inheritance

Creating a thread

List and set

Java 8 features

Bean scopes

@value

jQuery validation

loc container classes

loc principal

Package to import jpa

Type of collections map

26) Proctor- malvika

Share screen, video on

Oops concept

Polymorphism

Difference between method overloading and method overriding

Multithreading

Types of Exception

loc

Scenario

Entity management process

Dynamic binding in java

POM.XML full form and use.

What method for @bindingresult to find errors and exceptions

Model attribute and its use.

27) Spring mvc

jsp / jstl

Jpql

@entity

@id

how to insert data in a table

manipulations in jpql

annotations
@valid
@ request body response body
what is bean
@autowire
@transcional
@ pattern
@ model attribute
@ entity manager factory bean
@ persistent context
servlet...
dispatcher servlet.
Exception handlings.
@NotNull means
Min and max annotations

- 28) Scenario
Entity management
IOC
OOPS concept
METHod overloading overriding
Exception handling
New Java 8 features
DAO layer
How validation was done in scenario

- 29) Apurva
Video on - 20 mins
Scenario
Radiobutton syntax
Multiple inheritance
Thread
Mvc life cycle
Servlet life cycle
Interface
Serialization
Multithread

- 30) By: Rao alleni harshavardhan
About entitymanager

How data is sent to controller
Custom exception
Radio button

- 31) Scenario
How to validate
Which class we use @NotNull annotations
loc
Entity method
What is collections in java
Share the screen and implement the set collection
- 32) Proctor : Apurva
Spring boot
Lambda expression
Jpa
Annotations in jpa
Scenario
@Transactional
Collection and enhanced for method
Bean scope
Entity lifecycle
- 33) proctor: ritika
1) Only questions based on scenario (almost all annotations where it is used)
2) Custom exception code
3) A code based on constructor
4) servlets vs jsp
5) interface
6) spring jpa
7) list vs set
- 34) Ritika
1. Scenario
2. Jpa
3. Code for custom exception
4. Code for any of the collection
5. Jdbc
6. @Autowired

7. Which annotations used where
8. Interface
9. New features in java8
10. Difference between servlet config and servlet context
She asked many questions that I didn't know

35) Proctor : Purushottam imaya

Time around 5 mins

No cam.

About spring boot

@model attribute

What annotation used for getting limits in scenario.

Radio button syntax

Dispatcher servlet

Adv of spring boot

Functional interface

Life cycle of a servlet

36) proctor: Harshavardhan

5 mins

No cam

1) radiobutton syntax

2) custom exception

3)how we configure entity manager in XML

4) autowired annotation

37) Proctor : Ritika Nema,

Cam: on , screen-share: on, time:around 30 min

so many questions from advanced java and so many questions on scenario,

She asked servlet life cycle, jsp life cycle,

Flow of MVC

Dispatcher servlet

From core java : she asked to write parameterized constructor program

She asked me to write : collection program,

She asked 20+ questions in total!

38) Purushottam Imaya, no cam, no SC

7-8 Questions on scenario.

Functional Interface.

Adv. Spring boot

Repository annotation.
