PROFILE

Aspiring for the position of Full Stack Developer where I can use my extensive knowledge of programming languages and frameworks to develop dynamic and efficient web applications.

PROJECTS

Movie Ticket Booking

- Developed a dynamic and responsive Movie Tickets Booking Application using the MERN stack.
- With a React-based frontend, users can effortlessly navigate through available movies, select preferred seats from an interactive layout, and complete bookings with a streamlined payment process.
- Implemented secure user authentication using JWT and password encryption is provided using the bcryptJs package.
- Integrated Payment integration using Stripe.
- Ant Design Library for UI Components, Redux and Redux Toolkit for State Management.

Nursery Management System

- This online nursery management system is a Java-based e-commerce platform that facilitates the buying and selling of plants.
- It provides a user-friendly interface for customers to explore a variety of plants, trees, and gardening supplies.
- The platform includes a shopping cart where users can add selected plants and gardening items.
- Administrators have access to a dashboard where they can manage product listings, update prices, track orders, and monitor customer interactions.

Internship

- Successfully completed a one-month internship with HAL, focusing on gaining practical experience in networking and database management.
- Contributed to the development and enhancement of a Student Information Management System, gaining hands-on experience

Certifications

- Certification of Internship and Training on MERN Stack Course Completion from DCT Academy, Bangalore.
- Achievement certificate from "TATA CONSULTANCY SERVICES" on completing TCS ION Career Edge Young Professional.
